

Many of the procedures that can be done with the SofTap® hand method are as follows:

EYEBROWS

Eyebrows provide the framework for your face. We design brows that are unique to each individual.

To insure balance and symmetry a template is made, with the client's participation in the process.

We can design individual hair strokes in the eyebrows, fill in brows lightly, and fill them in solidly.

EYELINER

Do thin, fine lines for eyeliner and lash enhancement, smudgy effect for eyeliner, combination smudgy liner and lash enhancement, thick upper and lower eyeliner color between the lashes can give the appearance of fuller, thicker lashes. Color built up on to the lid can give a more dramatic look.

LIPS

Full lip color, lip liner, lip extension, and any of these combinations for lips. Get back the look you had when you were in your 20's and did not need lipstick. Soft, natural colors or more vibrant shades are available.
